

# PEGAZUS 450

## Technical data:

<b>CE category:</b> C (inland and near shore sea)	<b>Weight:</b> 280 kg
<b>Max engine:</b> 36.8 kW / 50 HP	<b>Max load:</b> 520 kg
<b>Shaft length:</b> Long shaft	<b>Max people:</b> 5
<b>Measures:</b> 4,40 m x 1,95m	<b>Draft minimum:</b> 0,3 m

PEGAZUS 450 is an excellent motorboat that combines advantages for casual users and fishermen. The **key features** of this boat are:

- **Performance and Design** - Innovative “wave-breaker” hull providing great performance on water, excellent wave cutting ability, highly reduced water spray on deck, clever rear hull extensions working as trim-flaps and prevent bow raise.
- **Safety and stability** - very wide construction (1,95m!) that gives stability and safety during usage. It also provides a wide and spacious deck that fits 5 people with luggage. High board ensures safety.
- **Comfort of usage** – spacious and wide deck makes you feel comfortable and safe during boat usage. It also fits all the necessary equipment. High board made it possible to put seats higher so it’s more comfortable to use them. The deck is self-draining with a valve by the transom.
- **Upgrade possibilities** – unique “Do it Yourself” idea makes it possible to adjust the boat to your needs. All the equipment parts are designed to be fitted as easy as possible to an already existing basic boat so you can upgrade it year by year and develop the boat according to your needs.
- **Easy to transport** – it was designed to be transported on a light trailer up to 750 kg total weight with load so you can take your boat everywhere you want.

PEGAZUS 450 has outstanding on-water performance. A sharp front is cutting the waves and guides the water outside to prevent water spray going to the deck. Wide construction and great desing gives this boat high stability and safety even during tight turns.

Extended rear on the both sides of the transom create additional rear floatation and work as “trim flaps” so the boat is not afraid of increased weight on the rear, starts faster and the most important – does not lift the bow during drive.

Wide construction made the deck of PEGAZUS 450 spacious and comfortable to use. Pegazus 450 in the standard version has a large, waterproof, lockable middle locker and front locker. It is mostly chosen by fishermen that require free space on both sides of the boat and prefer engines with tiller handle.

Pegazus 450 can be upgraded with steering console and then equipped with up to 50HP outboard engine with remote control. This package gives most fun from drive as the boat can reach around 65 km/h speed and can also tow a ski rider. Front part of the boat can be transformed to a comfortable and spacious sunbed especially appreciated by the ladies.

Minimum recommended engine for Pegazus 450 standard version is 15/20HP. Below unit equipped with Suzuki 20HP with low load and 2-3 people on board reached planing speed of around 31 km/h. A very good “price to power” choice is 30HP, especially with tiller steering. If you plan to run the boat with full load and 5 people on board then a 50HP is a safe choice.

An unique feature of PEGAZUS 450 is the modular construction of the boat and designed equipment. Every equipment part is designed for easy installation to an already existing basic PEGAZUS 450. It gives our customers an opportunity to upgrade their own boats and fit them exactly to their needs.

You can choose from a variety of equipment options. Please find below a description of each.

## STEERING CONSOLE

Steering console in PEGAZUS 450 is a great addition for those who want to equip bigger engines or just prefer steering wheel than tiller handle. On top of the console there is a plexi glass windshield to protect the steersman. The stainless steel rail gives additional handling and protection for the windshield. Top of the console is made as a shelf for all small personal belongings like mobile phone or serves as a place for echo sounder. In the package you can find an additional laminate panel to install engine remote control. Mechanical steering system with steering wheel comes in the package as well. There is also a 12V electricity socket. The console package includes complete electrical network inside the console with main power switch located below console on the service hatch. Inside the console you will find the fuse panel and connections. the console and power cable long enough to be guided to the middle locker. Inside each PEGAZUS 450 BASIC there are pipes to guide the cables inside the boat.

### **ADDITIONAL 2 SIDE LOCKERS**

A set of 2 additional side lockers for the front part of the boat. They provide an additional storage space and are a base for sunbed or an American-style “bass-boat” front fishing platform.

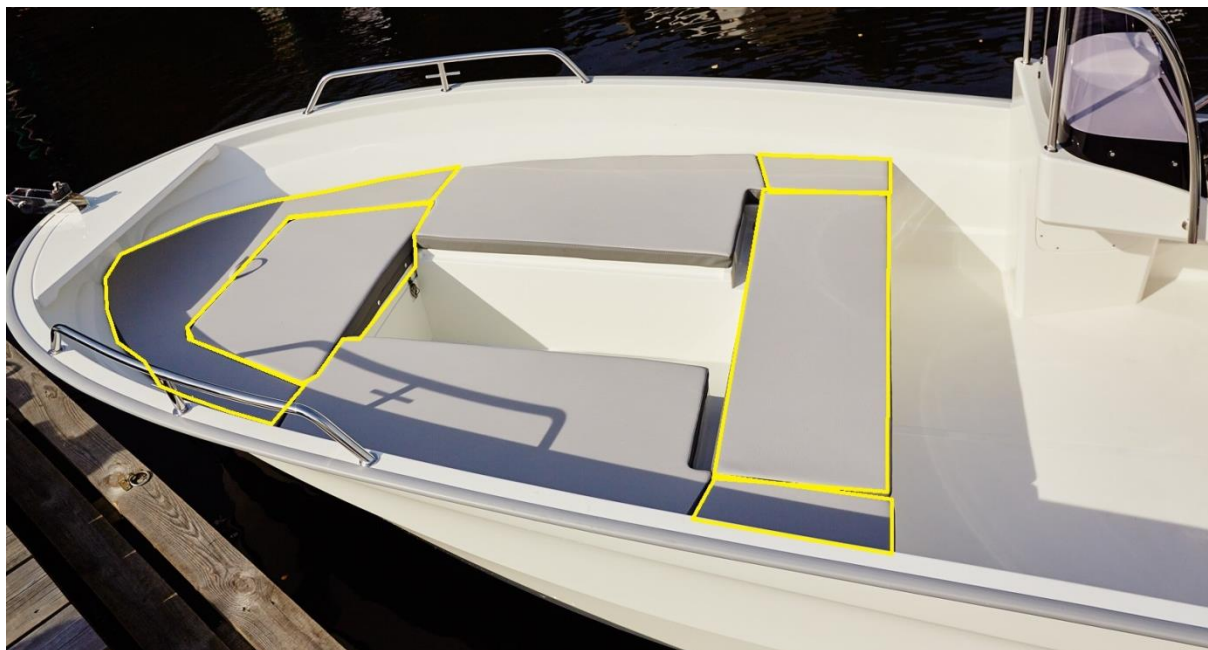

### **ADDITIONAL REAR SEAT/TANK COVER**

A great addition both to console and standard PEGAZUS 450. It is a laminate cover for the rear part of the boat. It moves on 2 stainless steel hinges so you can open it to take the fuel tank out.

### MATTRESSES FOR FRONT AND MIDDLE LOCKER

A set of 5 mattresses to be installed on the standard front and middle locker. They are a part necessary to create a full sunbed. Installed with naps and Prefix to ensure they hold during drive.

### MATTRESSES FOR REAR SEATS

A set of 2 mattresses for standard rear seats.

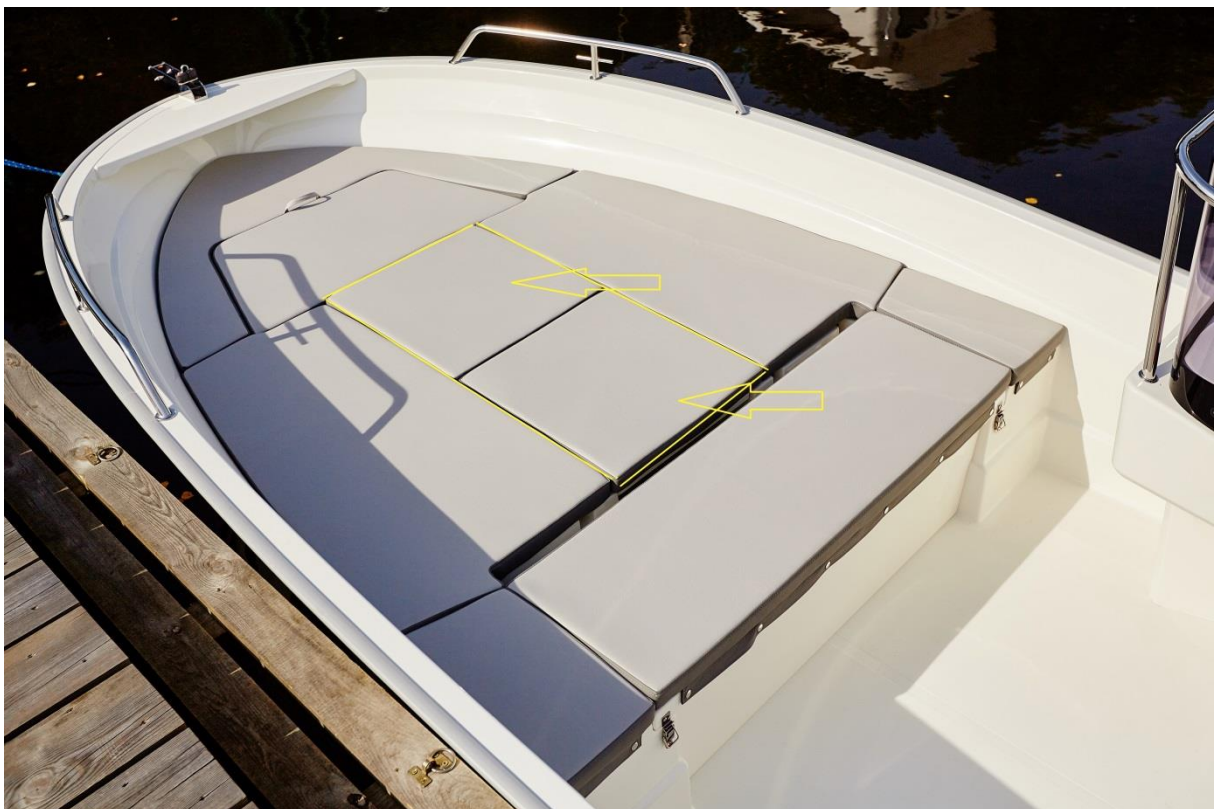

### **MATTRESSES FOR ADDITIONAL REAR SEAT/TANK COVER**

A mattress for the additional rear seat/tank cover.

### **SUNBED MATTRESSES WITH 2 LAMINATE PANELS**

A set of 2 laminate panels that lay on the side lockers and 2 mattresses. The 2 laminate panels can be hidden in the front lockers when you don't need them.

### FRONT STAINLESS STEEL RAILS

A set of 2 front rails made of stainless steel. In each middle part there are additional metal rods that work as mooring cleats.

### REAR STAINLESS STEEL RAILS

A set of 2 rear rails made of stainless steel. In each middle part there are additional metal rods that work as mooring cleats.

## BATH LADDER

Stainless steel bathing ladder long enough due to 5 step construction. It is a great addition for those who want to have an easy access on board from the water.

## Navigation lights (BSH) – to be installed with steering console

In order to use the boat during afternoon/night you need the navigation lights system. In the package you get a set of light installed on a stainless steel handle. The bottom light is 2 color (green/red) navigation light and on the detachable rod there is an anchor light. Both lights meet the German standards for boat navigation lights BSH. On/off buttons have to be installed on the console and connected to the electric installation.

If you want to have the navigation lights on a standard PEGAZUS 450 please make an individual request.

### **BOAT COVER – FOR BOAT WITHOUT STEERING CONSOLE**

In order to keep your boat dry and clean it is worth to choose a cover. In this version it has 2 aluminum supports inside the boat to keep the cover stretched to guide water out. In order to keep the cover properly attached we use nap and Qsnap buttons.

### **BOAT COVER – FOR BOAT WITH STEERING CONSOLE**

In order to keep your boat dry and clean it is worth to choose a cover. The steering console keeps the cover stretched to guide water out. In order to keep the cover properly attached we use nap and Qsnap buttons.

## **BIMINI – FOLDABLE ROOFTOP**

It is a great addition for those who seek some sun protection on the boat. Stainless steel frame folds to the rear so you can close the bimini when you want to sunbath. The roof material folds into a material casing provided in the package.

## TENT FOR THE FRONT PART OF THE BOAT

Unique addition to PEGAZUS 450. A tent that completely covers a front part of the boat and creates a spacious cabin.

If equipped together with sunbed it creates a great sleeping space for 2-3 people. The tent is supported by carbon fiber poles that can be folded together with tent material.

### **AUDIO SYSTEM WITH SONY MARINE RADIO USB/BT AND 2 SONY MARINE SPEAKERS**

It is possible to install a radio on the console of PEGAZUS 450. The radio is Sony Marine with USB/Bluetooth/AM/FM. There are 2 waterproof speakers installed on the front of the console. Antenna is installed inside of the console.

### **ADDITIONAL REAR LEFT LOCKER**

Additional locker located on the rear left side of the boat. It can easily fit around 20L fuel tank or battery.

**PEGAZUS 450 in action:**

Big enough engine (50HP) enables to use PEGAZUS 450 as a ski/wakeboard boat. You can see the movie on Pegazus Youtube channel: <https://www.youtube.com/watch?v=Kw0Xb-zzR-c>

PEGAZUS 450 is an excellent fishing boat. It is even used to sea fishing with trolling method (6 fishing rods behind the boat!)

Beautiful scenery of lake Dospad in Bulgaria

Great package with front fishing chair, steering console and 50HP engine. Video from testdrive with 50HP engine: <https://www.youtube.com/watch?v=iBVgdzH8yoQ>
