

FINVAL

ALL-WELDED ALUMINIUM FISHING BOATS

MODEL LINE-UP
2022

HEADING TOWARDS PERFECTION

Striving for excellence is a fundamental principle that we follow when we create our boats. There are many passionate and experienced anglers in our team. Together we defined the qualities which are essential for a boat to be ideal for fishing and recreation. First of all, it is seaworthiness allowing to reach the place of fishing or picnic quickly and comfortably, even through large waves. The well-planned inner space will allow keeping all the stuffs and baits in convenient places while the boat's good seakeeping ability in critical situations will bring the feeling of confidence and security. The excess strength guarantees a boat's trouble-free operation for many years.

Many famous anglers and fishing guides from across Europe choose Finval. We are proud of their achievements and pay due regard to their invaluable experience in creating new models of boats. Finval commits to the development of fishing sport. Every year we sponsor numerous fishing competitions in different European countries. Finval is the official sponsor of the Cup of Ukraine and Ukraine's national team at the World Championship in spinning from a boat.

SEAWORTHINESS AND STABILITY

Fishing under any weather conditions is our concept of seaworthiness! To ride comfortably at high speed under heavy wind and wave you just need to make a hull which is not too wide and has a deep V. However, such a boat will be too cranky during the moorage. Walking and fishing on it will not be comfortable. Making a boat wider and with a smaller dead rise will mean that it will lose good part of its seaworthiness. Our designers with many years of experience are finding the best possible length-to-width ratio and create the boats which are stable and seaworthy at the same time.

ULTIMATE STRENGTH AND ENDURANCE

Boat's durability and long-lasting performance first and foremost rely upon the strength of the structural framework. This is the most complex and most expensive structural element. Nevertheless, we never sacrifice quality of what is hidden under the finishing of our boats and offer 10-year warranty on aluminium hull of all Finval boats.

SAFETY AND FLOATATION

A really safe boat, in case of bilge or spillage, should keep afloat and not capsize.

To ensure floatation, all hulls of Finval boats are filled with high-quality two-component foam. It has a closed cellular structure that prevents water absorption.

To ensure that the boat does not capsize in a semi-submerged state, and passengers feel safe, the buoyancy blocks are placed evenly along the hull of the boat and closer to the sides.

The foam in the bottom area is sprayed on a special bed of extruded expanded polystyrene sheets. This material has almost zero water absorption and provides additional protection of the foam against contact with moisture. Also, this technology provides a 50 mm gap between the bottom and the buoyancy blocks, which is necessary for water drainage and ventilation of the hull from the inside.

All Finval models are the result of fulfillment of our dream, where every square centimeter is thought out and has its purpose.

The Finval comfort formula comprises three components:

- experience of the best European anglers and fishing guides
- original and well-thought-out interior layout of the boat
- only high-quality components and a multi-level quality control system

685 FISHPRO

Finval 685 FishPro is a multi-purpose boat that can be used for both family vacations and fishing tourism. The consoles have anodized aluminium fitting and a reliable wind protection of tempered glass. Autonomous heater and heated seats will help warm up in cold weather. Special compartment with removable recycle bin helps keep the boat clean. A locker for 10 spinning rods and a 130 l livewell with oxygenator, an organizer for large baits and side shelves create comfort while fishing. Finval 685 FishPro is capable of reaching the speed of 100 km/h, has a string hull and is ready for operation under any weather conditions.

SPECIFICATIONS

Length 6.83 m

Beam 2.32 m

Transom height 635 mm

Draft 400 mm

Deadrise at transom 18°

Weight (boat only) 1 050 kg

Maximum weight capacity 1 220 kg

Engine 250-300 hp

Hull material AlMg 4,5 Mn (5083)

Aluminum thickness
(bottom / transom / boards) 4 / 4 / 3 mm

Number of passengers 6

Fuel tank 220 l

Livewell 135 l

Rod storage
(quantity / length) 6 / 2.8 m
4 / 2.7 m

BOAT LAYOUT

- 1 base for a seat pedestal
- 2 lockable storage compartment
- 3 rod storage compartment
- 4 external console glovebox
- 5 storage compartment for a full canvas enclosure under a console
- 6 driver console
- 7 passenger console
- 8 compartment with a recycle bin
- 9 locker for electric motor traction batteries
- 10 board shelf with built-in niche
- 11 organizer with built-in cup holders
- 12 folding seats
- 13 livewell
- 14 transom extension platform

Spacious cockpit with side shelves and built-in niches.
Possibility to install an additional row of seats.

Consoles made of high-quality plastic are decorated with anodized aluminium pads.

Shockwave S5 suspension system in a standard configuration.

Charging batteries and controlling the trim of the engine* from the bow deck.

Folding ladders built in a transom extension platform.

The bow deck has 2 storage compartments with a capacity of 120 liters each and a locker for 10 fishing rods. All lockers are equipped with a forced ventilation system.

* - optional feature

Organizer for large baits with cup holders and LED light.

Board shelves with built-in niches and LED light.

Front heated seats.*
Boards with ecoleather finishing.*

STANDARD FEATURES

All-welded hull made of marine grade aluminium
almg4,5mn (5083) 3-4 mm thickness

Raptor® wear-resistant coating on consoles, transom, and gunwale

Two consoles with a Taylor Made walk-through tempered safety glass windshield and a wicket door in the middle

Outer sides are covered with a hydrophobic wrap (color to choose)

Inner boards in the cockpit, on the bow and the aft decks covered with marine grade cut-loop carpet

Cockpit deck covered with marine grade vinyl

Transom platforms covered with soft anti-skid SeaDek surface

Fuel system with a 225 liter aluminium tank

Two lockers in the bow deck with a gas spring device of the covers

Rod locker in bow deck for 10 rods up to 2.8 m long with a gas spring device of the cover

Compartment for storage of the full canvas enclosure

130 liter livewell with an oxygenator and led light

Two Bass Boat seats with back/forth adjustment

A set of two marine suspension systems Shockwawe S5

Pedestal base for a fishing seat on the bow deck

Pocket for keeping a landing net

Locker for traction batteries in the cockpit

Double USB 5V 2A power socket in a captain console

Double USB 5V 2A power socket in a passenger console

12v power outlet on a captain console

LED-lighting of cockpit, aft, and bow decks, lockers, the passage between consoles, boards' niches, and shelves, aft organizer

Dry lockers with forced ventilation and drainage system

Six SS push-up mooring cleats

SS compression latches (3 with a lock/ 1 without a lock)

Preparation for installation of audio system, chart plotters, trolling motor, high-pressure washer, heated seats, autonomous heater

LUX snap-in travel/mooring cover

Steering wheel

Automatic bilge pump

* - optional feature

Finval 685 Sport Angler has unique characteristics. Quick start and excellent maneuverability at speeds over 100 km/h. The durable hull withstands strong slams, and the load on the spine is relieved by the premium class shock-absorbing system Shockwave S5. The boat can accommodate 12 spinning rods up to 2.8 meters long. The central storage compartment for personal items and fishing tackles is zoned with special removable partitions. 2 echo sounders with 12" screens can be installed not only on the driver's but also on the passenger's consoles. The boat has 2 livewells with an oxygenator with a capacity of 110 and 130 liters. Finval 685 Sport Angler gives you an advantage in speed and comfort. It is an embodiment of modern design and uniqueness. This boat is for those who do not compromise in striving to be first.

Automatic bilge pump

Finval 555 FishPro has the right to compete for the title of the best boat among the competitors of this size. It has plenty of trifles that can be appreciated even by the most demanding customers. The comfortable and spacious cockpit accommodating 6 passengers has convenient side shelves for boxes with baits and a locker for 6 spinning rods 2.7 m long. There is enough space in the bow deck lockers to store baits and passengers' personal items. The bow and stern decks have plenty of free space for fishing. The spacious full canvas enclosure, a folding table, a ski pylon make 555 FishPro comfortable for family leisure. If you like fishing on big rivers and lakes and want to enjoy the drive of a controlled flight combined with comfort, the Finval 555 FishPro is created just for you.

FULL CANVAS ENCLOSURE

176 cm high canvas enclosure in the cockpit with maximum protection from rain and wind.

Side curtains and aft curtain
can be installed separately

High Top leaves the stern podium open and does not
prevent from fishing.

Finval 475 Evo DC is the widest among boats up to 5 meters long. Its aft deck is 192 cm wide. This is enough for two people to comfortably fish together, or just relax lying on it. The boat is also convenient for travel. Throughgoing windshield protects both front and rear passengers from the wind. Numerous lockers and shelves allow to organize the interior space so to not keep things in the cockpit. High Top canvas enclosure will help to hide from the sun in summer. If you fasten the side and back curtains to it, you will have reliable protection from rain and cold wind. One can choose the layout of the bow and stern decks. All these features make Finval 475 Evo DC one of the most popular boats in Europe.

Finval 475 Evo SC is created on the basis of a two-console model which is a top seller in many European countries for years. The wide aft deck and spacious cockpit make fishing comfortable even in a large company. Functional and practical driver's console is decorated with anodized aluminium pads. Most demanding anglers will appreciate the possibility of installing two 12" echo sounders. Next to the passenger's seat, there is a spacious glove box convenient for keeping valuable personal items. It has a separate section with a USB socket to charge a mobile phone. The boat is well equipped for fishing and will meet the needs of both beginners and experienced anglers.

Finval 475 Evo Tiller is well equipped for trolling and vertical fishing. The width of 212 cm with a length of 472 cm makes it an absolute record among boats of this size that ensures maximum space and stability. Two echo sounders with a screen diagonal of 12" and more can be easily mounted on the driver console. The large glove boxes in the driver console have plenty of space for boxes with your favorite baits. Organizers for fishing tackle, cup holders and rod holders can be placed anywhere you want. And all this at arm's length. If you are looking for a spacious boat up to five meters long and want to fish with maximum comfort, Finval 475 Evo Tiller is an ideal option.

SPECIFICATIONS

Length 4.72 m

Beam 2.12 m

Transom height 508 mm

Draft 330 mm

Deadrise at transom 14°

Weight (boat only) 480 kg

Maximum weight capacity 635 kg

Engine 60-100 hp

Hull material AlMg 4,5 Mn (5083)

Aluminium thickness 3 mm

Maximum persons capacity 3

Fuel tank 53 l

Livewell 90 l

Rod storage 2 / 2.9 m
2 / 2.45 m

BOAT LAYOUT

- 1 storage compartment
- 2 base for a seat pedestal
- 3 livewell
- 4 underdeck niche / locker with hatches - at choice
- 5 locker for electric motor traction batteries
- 6 rod storage
- 7 command console with glove boxes

The width in the driver's seat area is 192 cm which is a record among boats up to 5 m long.

Basket for large baits.

Drawer for boxes with baits.

Pocket for a landing net can be additionally installed in the starboard.

Preparation for the installation of echo sounders, electric motor, and electric winch

Ten SS hatch latches: 6 with locks, 4 without locks

Lockless livewell hatch latch

Front passenger handle in the port

Rubber holders for rods at port side and starboard shelves

Automatic bilge pump

Finval 510 Rangy-SC is developed based on the tiller control model and maintained its basic advantages: plenty of free space and shallow draft. The low board does not create an obstacle in fishing, pulling up and picking up the fish with your hands. At the same time, 510 Rangy-SC has an excellent seaworthiness and allows to feel safe on high waves. The console creates comfort for the driver and allows installing 2 echo sounders. Spacious lockers have high-quality stainless steel fittings, and two of them can be used for storing fishing rods. Decks and the cockpit is made of aluminum, which improves reliability and durability. 510 Rangy-SC can be ordered in either vinyl or carpet interior decoration.

SPECIFICATIONS

Length 5.1 m

Beam 1.9 m

Transom height 508 mm

Draft 150 mm

Deadrise at transom 6°

Bow tent for two persons with a stainless steel frame.

Removable side and front curtains made of transparent PVC film.

Additional mosquito net on the entrance curtain.

Finval 510 Rangy is not just a fishing boat with tiller steering. It has all the most demanding fishermen could wish. Maximum free space from the stern to transom allows to fish in comfort even in a large company. Its small draft enables reaching the remotest and most hardly accessible parts of your favorite reservoir. Small deadrise at transom of 510 Rangy allows using low power engines. At the same time, the boat has good seaworthiness due to the optimal width-to-length ratio. Finval 510 Rangy will make you feel confident and safe even on big rivers and lakes.
